The Chronology Lens™ in action. Drag the lens or choose a stage. This is a fictional illustration; names, message IDs and exhibit references are invented.

*“Records, records, VeriCase.” -
Making Time Your Ally, Not Your Enemy.*

THE REASON WE BUILT VERICASE

Your case begins with the record.

As Max W. Abrahamson observed in *Engineering Law and the I.C.E. Contracts* (first published in 1965):

“A party to a dispute, particularly if there is arbitration, will learn three lessons (often too late): the importance of records, the importance of records and the importance of records. It is impossible to exaggerate the extent to which lawyers can find unexpected grounds, often quite real, on which to cast doubt on evidence if it is not backed by meticulously established records.” [Emphasis added]

VeriCase exists so these lessons need not be learned the hard way.

Time is your ally. Not your enemy.

Time is what every practice is trying to keep. The advantage lies with the people who can see what the record shows before the timetable runs out.

VeriCase turns a disordered project record into arguments that can be checked against their sources. It is for the people who prepare claims, and for the lawyers and consultants who work with them.

It is most useful at the start of a matter. A factual chronology used to mean reading tens of thousands of emails by hand. VeriCase puts that correspondence in order, and each entry keeps its source.

The firms that work this way advise from the record. The others are still reading it.

Thousands of records. One question that matters.

40,000 ^[1]

emails, one project, five months

5.5 ^[2]

hours a week looking for project data

18% ^[3]

of project time searching for data in the
UK and Ireland

THE VERICASE SOLUTION

Bring the records together

Ask a question

Build the bundle

Test an account

Develop the argument

Work together

I The Chronology Lens™

Many threads. One order of events.

Bring emails, attachments and project documents into one searchable record. Read the correspondence in date order, with each entry linked to its source.

Where the record fails

An instruction sits in an email. The qualification is in its attachment. A later reply changes the picture.

Where VeriCase comes in

Search emails and attachments together. See matching passages in date order, then open the records behind them.

- **Bring the files together**

Upload mailboxes, emails, attachments, documents, spreadsheets and images. Text recognition makes scanned pages searchable.

- **Read each reply**

Threading and quoted-text handling separate new replies from the history beneath them.

- **Review in context**

Filter by dates and keywords, check what was set aside, and distinguish forecasts from instructions and confirmations.

Illustrative search from a fictional construction matter.

Ask a question. Read a cited answer.

Ask a focused question in plain English. Executive Analysis answers from the evidence and lets you follow up as new points emerge.

Where the record fails

A summary reaches you without its sources. Before you can rely on it, the checking starts again.

Where VeriCase comes in

Read the answer alongside its supporting records. Follow the citations and check what the material establishes.

- **Follow the question**

Ask follow-up questions as new points emerge.

- **Check the evidence**

Open the cited records, keep the relevant material and note what was not found.

Answers depend on the material in scope; they are not a complete account of events.

Just ask.

V

Research

Executive Analysis

1,084 evidence items in scope

When did the client first ask for early access to the nursery?

On 12 March 2025. The client's project manager asked for fit-out access by 01 September 2025.

Did they ever confirm it as a change?

Not before completion. Two weeks later their representative said later access was not acceptable to the nursery's funder, but the change request for early access only came on 14 January 2026.

SUPPORTING EVIDENCE
Email of 26 March 2025: later access not acceptable to the funder.
Change request 21, 14 January 2026: early access to the nursery.

CONFIDENCE SCORE
78/100
Consistent across both sources.

Illustrative questions and answers from a fictional construction matter. The score is illustrative.

COST CALCULATOR

What does the evidence cost your team?

Estimate the professional time spent finding, reading, discussing and bundling evidence. Every rate and reduction shows its basis.

III Reports and bundles

A report. Its evidence. One bundle.

Deep Research produces a report with its sources. Create a bundle containing the report and cited records, with a cover, index and page numbers.

- **Set the order**

Arrange the evidence around the report. The cover page stays first.

- **Prepare the PDF**

Complete the cover, choose the numbering and download the indexed bundle.

A bundle, built and downloaded.

ITEM 1 · REPORT

VeriCase Analysis Report

QUESTION What notice did the Contractor give of delay from the loading bay reduction?

SOURCES CITED 14

VALIDATION Passed

Executive summary

The Contractor's first warning came in monthly report 11, its effect still being assessed. Six weeks later its commercial manager put the delay at two months. The Employer's Agent replied by asking which clause it relied on.

3

Illustrative bundle from a fictional construction matter.

IV *The case room*

Their points, numbered. Your replies, cited.

Examine the other side's account point by point. Bring supporting and conflicting records alongside each assertion, with proposed replies for your team to review.

Where the record fails

Under time pressure, the easiest points to answer can take attention from the assertions that need further investigation.

Where VeriCase comes in

Consider the evidence beside each point. Review the proposed reply, its references and any gaps before developing your response.

- **Test each assertion**

Set supporting and conflicting records beside each point. Identify what still needs investigation.

- **Prepare the response**

Review and edit the proposed replies with their sources before anything is sent.

Answer the other side, point by point.

V

Sample project

Rebuttal

THEIR RESPONSE · PARAGRAPH 31

The courtyard paving revisions were design development by the Contractor's landscape architect.

EVIDENCE

Change request 14 16 June 2025

Revise the courtyard paving to the layout attached.

Challenges

Drawing issue sheet 22 July 2025

Revision C: courtyard paving, following change request 14.

Challenges

PROPOSED REPLY

The paving was revised in answer to the client's change request of 16 June 2025, not as design development (Change request 14; Drawing issue sheet, 22 July 2025).

• WHO WE SERVE

Accessible for every dispute

For the people building the case and the people running the job.

Law firms & arbitrators

Test competing accounts against the record. Find the documents that support or contradict a position, with the sources ready to review.

Claims consultants & experts

Build the factual chronology, uncover pivotal details and connect each point of your analysis to its supporting evidence.

Contractors & in-house counsel

Understand what the record shows while the project is live. Keep instructions, correspondence and the developing claim connected.

Built on experience.

Founded by construction claims and dispute resolution practitioners. Built around the demands of real casework.

William Rogers

Co-Founder · Claims Advisory and Forensic Quantum Expert

- MCI Arb, Chartered Institute of Arbitrators
- Forensic quantum expert
- Live instructions in excess of £100m

William brings more than 15 years of construction claims and disputes experience across infrastructure, water, power, rail and residential projects. A quantity surveying and commercial management specialist and Member of the Chartered Institute of Arbitrators, he acts as a testifying quantum expert. His work spans adjudication, arbitration and TCC litigation. He brings the practical demands of preparing evidence, developing claims and briefing experts and counsel into VeriCase's product direction.

[Full profile and experience](#)

A construction claims and disputes specialist with over 15 years across the water, power, rail, infrastructure and residential sectors, qualified in quantity surveying and commercial management and a Member of the Chartered Institute of Arbitrators. He founded his first commercial management consultancy in 2016 and has since built Meritus Group, Orrery Group, Peak Developments and VeriCase, a legal technology platform combining forensic evidence review with a chronology engine built to the SCL Protocol. His portfolio spans adjudication, arbitration and

TCC litigation under NEC, JCT, FIDIC and IChemE forms, with live instructions in excess of £100m across residential, regeneration and infrastructure schemes, and prior roles on international arbitrations exceeding \$600m. He acts as a testifying quantum expert and leads claims and recovery across a national contractor's distressed portfolio, preparing each case in house so that experts and counsel are instructed only when it is ready.

Warren Kemp

Co-Founder · Dispute Resolution

- Partner, gunnercooke LLP
- Co-founded DAC Beachcroft's construction practice (2013), circa 50 lawyers
- Former Joint Head of Construction & Engineering, DAC Beachcroft
- Ranked in Chambers UK and The Legal 500

Warren is a construction and engineering disputes solicitor and a partner at gunnercooke LLP. His practice spans adjudication, arbitration, mediation and TCC litigation, advising contractors, developers, consultants and insurers. Previously joint head of construction and engineering at DAC Beachcroft, he brings more than twenty years of legal practice to VeriCase. His contribution centres on the commercial judgement, evidential discipline and clear argument that construction disputes require.

[Full profile and experience](#)

Warren is a construction and engineering disputes solicitor of more than twenty years' standing, admitted in 2002, who advises developers, contractors, subcontractors, professional consultants and their insurers across the public and private sectors. He trained and built his practice in Newcastle, first at Watson Burton and then at DAC Beachcroft, which he joined as a partner on 01 November 2013 and where he and James Harrison set up the firm's construction practice that year. He went on to lead DAC Beachcroft's national construction and engineering team jointly with Mark Roach, a practice of circa 50 lawyers in the United Kingdom and internationally, until joining gunnercooke LLP in February 2024. His work spans adjudication, arbitration, mediation and Technology and Construction Court litigation, together with the professional indemnity dimension of construction claims and the non-contentious drafting that prevents them. He is ranked in Chambers UK and The Legal 500, which has described him as "simply the best around", and he writes regularly on construction law, including on CC Construction Limited v Mincione and on

the contractual treatment of anaerobic digestion plants. Warren acts, among his various roles, as General Counsel to United Living, a business approaching £1bn turnover with a telecoms division, and previously spent 18 months in house on secondment at the global consultancy WS Atkins. He combines a pragmatic, commercial approach with the tenacity to see a dispute through to decision.

Malcolm Brechin

Managing Director · Commercial Strategy & Go-to-Market

- CEO, Invent Group
- Former Director of Strategic Development, Mobile Rocket
- Over 25 years in commercial strategy and go-to-market

Malcolm brings more than 25 years of experience in commercial strategy and taking technology products to market. His career includes leadership roles at OfficeTeam, OT Group and Mobile Rocket, working across sectors including healthcare, recruitment and government. As Managing Director, he focuses on understanding customers' operational needs and translating them into practical products, working with the team to make VeriCase useful and commercially relevant to the organisations adopting it.

Full profile and experience

Malcolm is a commercial strategist with more than 25 years' experience building and scaling technology businesses across finance, retail, healthcare, hospitality and government. His career has centred on taking products to market: as business development director at OfficeTeam he led a national sales team and secured the William Hill distribution outsourcing contract; as National Director of New Business at OT Group he positioned the business on the Crown Commercial Service Tail Spend Solution framework; and as Director of Strategic Development at Mobile Rocket he led the go-to-market for its recruitment and healthcare platforms, now used by Amazon, Waitrose and the NHS, during the period in which the company was shortlisted for Recruitment Technology Innovation of the Year at the Recruiter Awards 2023. In 2025 he established NE Tech in County Durham, rebranded as Invent Group in 2026, which has since released VeriCase, Bid King and Schools-safe. Malcolm's focus is on identifying real operational challenges and turning them, in partnership with clients, into practical and commercially viable technology.

Sam Whisker

Chief Technology Officer · Automation & Product Engineering

- CTO, Invent Group
- Former Chief Technology Officer, Mobile Rocket
- Shortlisted, Recruiter Awards 2023

Sam is a software engineer and automation specialist with experience taking products from early ideas to working systems. A Teesside University graduate and former Chief Technology Officer at Mobile Rocket, he has worked on recruitment and workforce platforms and, since 2024, focused on automation. As Chief Technology Officer, he leads the engineering behind VeriCase, bringing software development and automation together around the needs of complex casework.

[Full profile and experience](#)

Sam is a software engineer and automation specialist who has spent his entire career writing code that changes how organisations operate. A Teesside University graduate, he began as a senior PHP developer at Stockton-based web development firm Koodoo Creative before becoming Chief Technology Officer of Mobile Rocket, the Newton Aycliffe company whose recruitment and workforce platforms are now used by organisations including Amazon, Waitrose and the NHS. During his time as CTO, Mobile

Rocket was shortlisted for Recruitment Technology Innovation of the Year at the Recruiter Awards 2023. Since 2024 he has concentrated on automation, advising businesses in sectors from manufacturing to recruitment on process automation, custom GPT systems and automated workflows. In 2025 he started NE Tech, now Invent Group, with Malcolm Brechin and leads its technology, building software products including VeriCase, for managing complex legal disputes, and Bid King, for tenders and proposals. Sam's strength lies in moving ideas from prototype to working, scalable systems that deliver measurable gains in operational efficiency.

Common questions

▼ We already have a document system. Where does VeriCase fit?

VeriCase is for working with the project record: searching it, asking it questions, discussing it and building bundles. It works alongside your existing document systems.

▼ What can we work with?

Mailboxes (PST), individual emails (EML and MSG), PDFs, Word documents, spreadsheets and images. Text recognition helps make scanned pages searchable. We can discuss your record types and preparation needs during a demonstration.

▼ Will the output be accepted by the tribunal?

Admissibility and weight are for the tribunal. Review the underlying records, the source references and the final document with the professionals responsible for the matter.

▼ Can we rely on what VeriCase finds?

Every answer shows its sources, so you can read them yourself. Review the records and the final document with the people responsible for the matter.

▼ How will you handle our project and client material?

Demonstrations use sample material. Before introducing your own records, discuss your organisation's requirements for hosting, access, retention and automated processing with us.

See VeriCase in practice.

See search, questions and bundles on sample material. Tell us what matters most to your team.

Please use sample material until confidentiality and data arrangements for your organisation have been agreed.

Research sources

These studies describe the information problem in construction. They do not measure VeriCase results or savings.

1. Mail Manager customer account, 2026

40,000 emails filed in five months on one Mercury Engineering project. One project, not an industry average.

[Back to figure 1](#)

2. PlanGrid / FMI, Construction Disconnected, 2018, p. 12

5.5 hours a week spent looking for project data, as reported by construction professionals. Vendor-sponsored survey of 599 leaders, mostly in the US.

[Back to figure 2](#)

3. Procore / Dodge findings, reported in Building Design & Construction Magazine, 2026

18% of project time estimated to be spent searching for data by surveyed UK and Ireland construction professionals. Vendor-commissioned survey of 688 professionals. A separate study from the 5.5-hour finding.

[Back to figure 3](#)

▼ Read the wider research: queries, rework and decisions

1,083,807 requests for information. 1,362 projects.

Navigant's 2013 analysis of Aconex records found an average of about 796 RFIs per project.

Projects began between 2001 and 2012; each had at least 100 RFIs. Around 79% were in Australia and New Zealand.

[Navigant Construction Forum, April 2013, p. 5](#)

48% of US rework attributed to poor data and miscommunication.

The 2018 PlanGrid / FMI research used respondents' estimates to model the impact of disconnected information.

A vendor-sponsored US estimate, not a measured cause across every project.

[PlanGrid / FMI, Construction Disconnected, 2018](#)

One in three poor decisions attributed to bad data.

Autodesk / FMI's global research linked poor decisions to inaccurate, incomplete or inconsistent project information.

Vendor-sponsored research published in 2021, surveying over 3,900 leaders. This estimate underpins the report's modelled rework costs.

[Autodesk / FMI, Harnessing the Data Advantage, pp. 14 and 15](#)
